

**This is the new QSL Card photo, originally taken and copyrighted in 2007 by Mike Yuhas, AB9ON, and it's used by permission. I have added information from my account at eqsl.cc – I do electronic QSL's ONLY – I could not afford paper QSL cards. I will give out business size cards for “eyeball QSO's”.**

**It's of SOO Line steam locomotive 1003, on Dec. 14, 2007, at Random Lake, Wisconsin, on the Wisconsin and Southern Railroad (WSOR), on the Plymouth Subdivision, at approximate milepost 125.19 – I would've loved to have been there, to listen to the mournful whistle, and even riding behind it. There's nothing like a snow/winter time shot, with a steam locomotive, and a passenger train.**

**After getting “burned out” from doing weather traffic on ham radio traffic nets for 28 years, I have shifted the emphasis to railroad crossing safety. For details, go to <http://www.theweatherwonder.com/rxr.htm>**

**Please see my bio on the QRZ website for more information.**
